Footnotes

1) For the 1981 Census, a usual resident of the UK is anyone who, on Census Day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.

2) In 1981, census respondents were asked to provide their date of birth, from which their age on Census Day was derived.

Footnotes

- 1) For the 1991 Census, a usual resident of the UK is anyone who, on Census Day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.
- 2) Under-enumeration affected census estimates from 1991, when the Mid-Year Estimate recorded 85,000 more residents than the census counts. The data presented in the Statistical Bulletin published on 17 December 2012 for 1991 are Mid-Year Estimates rather than the census results. However, in the Century of Census story, the census data for 1991 have been used to provide a consistent record of census results through time.
- 3) In 1991, census respondents were asked to provide their date of birth, from which their age on Census Day was derived.

Footnotes

- 1) For the 2001 Census, a usual resident of the UK is anyone who, on Census Day, was in the UK and had stayed or intended to stay in the UK for a period of 12 months or more, or had a permanent UK address and was outside the UK and intended to be outside the UK for less than 12 months.
- 2) The 2001 Census results were processed differently from previous censuses, as an attempt was made for the first time to include the number of people believed to be missing from the initial census counts, for example, those who did not return their questionnaire. In 2001, it was thought that 4 per cent of the total population were missed from the initial census counts and were therefore added to the estimates. This undercounting does not occur uniformly across all geographic areas or age groups.
- 3) In 2001, census respondents were asked to provide their date of birth, from which their age on Census Day was derived.
